Fishing

Calisthenics

About Me

I am an ambitious and hard-working student who is capable of group work and learning new skills. I have already learned to program in several languages. I have been involved in many projects such as web development, databases, and system development. I have the most knowledge of web development, and that's what I am interested in the most. I have one more final exam to complete my studies. I would like to find a job that is suitable for my skills.
